

## Create and Play Bingo on the iPad

1. Go to [www.bingobaker.com](http://www.bingobaker.com)
2. Title your card and add words or numbers. You can add more than 24 words (there are 25 squares but one is counted as a free space) as you can create multiple versions of the card and refresh them.
3. Tap Generate when complete. Only 24 of your words will appear at one time.
4. Bookmark your page or save your URL.
5. Your board is complete. Click the Play Online link on the left to have it live.
6. Give the students the URL to access the bingo game from their iPad or computer.
7. The students will tap a square to select a space on the square. It will turn orange.
8. Refresh your page for a new variation of the board.
9. Return to the view link (Use the same URL your view link will have view instead of play) to print a PDF version of your card. You can save it to iBooks as a PDF file or...
10. Open PDF in an annotating app for an alternate way to play.
11. The students can use a highlighter or pen in an annotating app to play.

\*Reminder: There is no way to edit it once it is generated.
